PSYCHIATRIST.COM

Keyword: August

Articles are selected for credit designation based on an assessment of the educational needs of CME participants, with the purpose of providing readers with a curriculum of CME articles on a variety of topics throughout each volume. Activities are planned using a process that links identified needs with desired results.

To obtain credit, read the material and complete the Posttest and Registration Form on pages 1106–1107 *or* go to PSYCHIATRIST.COM and complete the Posttest and Evaluation online.

CME Objective

After studying the article by Polo et al, you should be able to:

- Recognize the prevalence and the patterns of onset, impairment, and comorbidity of social anxiety disorder in US Latinos to screen patients appropriately

Accreditation Statement

The CME Institute of Physicians Postgraduate Press, Inc., is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

Credit Designation

The CME Institute of Physicians Postgraduate Press, Inc., designates this journal-based CME activity for a maximum of 1 *AMA PRA Category 1 Credit™*. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Date of Original Release/Review

This educational activity is eligible for AMA PRA Category 1 Credit through August 31, 2014. The latest review of this material was July 2011.

Financial Disclosure

All individuals in a position to influence the content of this activity were asked to complete a statement regarding all relevant personal financial relationships between themselves or their spouse/partner and any commercial interest. The CME Institute has resolved any conflicts of interest that were identified. In the past year, Alan J. Gelenberg, MD, Editor in Chief, has been a consultant for Axis Healthcare, Dey Pharma, PGxHealth, Myriad Genetics, and Zynx Health, and has been a stock shareholder of Healthcare Technology Systems. No member of the CME Institute staff reported any relevant personal financial relationships. **Faculty financial disclosure appears at the end of the article.**

This pretest is designed to facilitate your study of the material.

1. Among patients with social anxiety disorder, which of the following comorbid disorders is *more* likely to be found among Latinos who arrived in the United States as an adult (ie, 21 years old or older) than among non-Latino whites?
 - a. Drug abuse
 - b. Drug dependence
 - c. Conduct disorder
 - d. Agoraphobia

For Pretest answer and Posttest, see pages 1106–1107.
